
BRIGHTKIDCO EMAIL ECOSYSTEM
AVATAR: AUTISTIC PARENT
DOC 1 OF 6 — MASTER FOUNDATION (CROSS-LEVEL)
VERSION 2.0 — END-LEVEL FOR MARKETER WORKFLOW

This document is the psychological and operational foundation for ALL emails in the BrightKidCo email ecosystem for parents of autistic children.

Recipient: Email Marketer (Ayoub) as central briefing doc.

Reading order:

1. DOC 1 (this document) — read completely
2. DOC 2-5 (level profiles) — depending on avatar segment
3. Flow briefings (separate docs) — when building specific mails

TABLE OF CONTENTS

PART A: AVATAR FOUNDATION

1. Avatar definition
2. Demographic reality
3. Daily routines & micro-realities
4. Relationship strains
5. Financial reality

PART B: PSYCHOLOGY

6. The 4 emotional phases
7. Verbatim language bank
8. The 10 failed methods
9. Trust mechanic pyramid
10. Objection map
11. 5 big conversion levers

PART C: BRAND VOICE FOUNDATION

12. Brand identity & voice

13. Lena voice rules
14. Mary S. (founder) — when and how
15. Forbidden phrases & sensitive areas

PART D: ECOSYSTEM ARCHITECTURE

16. Pop-up setup & segmentation
17. Complete flow overview
18. Phased rollout
19. Klaviyo setup & tag logic
20. Email footer standard

PART E: OPERATIONAL FRAMEWORKS

21. Tonality calibration per flow stage
22. Cross-level calibration rules
23. Structural do's & don'ts per mail
24. Buyer journey mapping
25. Visual & design cues

PART F: MARKETER WORKFLOW

26. How to use this doc
27. Cross-references to DOC 2-5
28. Next steps

PART A: AVATAR FOUNDATION

1. AVATAR DEFINITION

WHO IS THE AUTISTIC PARENT?

A mother (95%+ of audience) between 28-48 years old, whose child:

- Is diagnosed on the autism spectrum, OR
- Shows clear sensory/neurological differences
- Is between 3 and 10+ years old
- Has been in pull-ups or diapers for months to years
- Doesn't show reliable "readiness signs"

- Has 1 to 5+ failed potty training attempts behind them

IMPORTANT — AUDIENCE DISTRIBUTION:

- ~35% Level 1 (verbal, younger children, fewer attempts)
- ~40% Level 2 (mixed, sensory dominant, BCBA context)
- ~25% Level 3 (non-verbal, older children, years of attempts)

BUT: In the first 30 days after pop-up signup, the level distribution is DISTORTED, because pop-up self-selection doesn't perfectly correlate with clinical level. Expect:

- ~50% choose "Still figuring out" = General Fallback
- ~50% distribute across Level 1/2/3

→ DOC 5 (General Fallback) is therefore the highest-volume profile.

2. DEMOGRAPHIC REALITY

GEO DISTRIBUTION (BrightKidCo target markets):

- USA: 65%
- UK: 15%
- Australia/New Zealand: 15%
- Canada: 5%

INCOME DISTRIBUTION:

- Upper middle income: ~30%
- Middle income: ~45%
- Lower income / Medicaid users: ~25%

LIFE SITUATION:

- Working (full/part-time): ~55%
- Stay-at-home / primary caregiver: ~40%
- Single parent: ~15% (overrepresented in Level 3)

EDUCATION:

- College-educated: ~60%
- Familiar with multiple therapy contexts (BCBA, OT, Speech): ~70%
- Has read diagnosis reports: ~80%

CHILD COMORBIDITIES (common):

- ADHD: ~30%
 - Anxiety: ~25%
 - GI issues (chronic constipation, withholding): ~40%
 - Sleep disorders: ~35%
 - Speech delays: ~50%
 - Sensory Processing Disorder: ~80%
-

3. DAILY ROUTINES & MICRO-REALITIES

These micro-realities are gold for email hooks. When 1-2 appear in a mail, the mom thinks: "They know my life."

THE MORNING ROUTINE:

- Check pull-up (often completely soaked or unused)
- Battle over getting dressed due to sensory clothing issues
- Breakfast with simultaneous supervision
- Stress about school/daycare departure time
- For Level 2-3: meltdowns possible before leaving house

THE DAYTIME ROUTINE:

- Change pull-up multiple times
- Watch for "signs" that never come
- Coordinate therapy appointments
- Balance sibling needs
- Email/Insta research during nap

THE PUBLIC SITUATIONS:

- Other moms at playground whose 2-year-olds are potty-trained
- Pediatrician at 3-year check ("Has he shown readiness?")
- Grandparents with unsolicited suggestions
- Changing diaper on restaurant bathroom floor
- Public pool prohibition due to pull-up
- Birthday parties with pull-up change in the car

THE PRIVATE MOMENTS:

- Researching at 2am ("autism potty training 5 year old nothing works")

- Reading Reddit / Mumsnet / autism Facebook groups
 - Getting pediatrician's "wait until they're ready" advice
 - Ordering pull-up size 7 or 8 while crying
 - Watching Instagram stories of other parents whose kids made it
-

4. RELATIONSHIP STRAINS

PARTNER CONFLICT (very common):

- Partner is not 100% committed
- Secretly hands out pull-ups during trips or visits
- Says "just let him, he's slow"
- She does 80%+ of the work, feels alone

SIBLING DYNAMIC:

- Younger siblings sometimes trained earlier
- Shame around the older autistic child
- Siblings get neglected due to high attention needs of the autistic child
- Family activities become restricted

GRANDPARENTS / FAMILY:

- Unsolicited advice ("you were done by 2")
- Comparisons with cousins
- "Maybe too much screen time?" suspicions
- Generational conflict around autism understanding

FRIEND CIRCLE:

- Loss of friends without special needs kids (can't be spontaneous anymore)
 - New friends in autism communities
 - Online friendships become more important
 - Social isolation is real
-

5. FINANCIAL REALITY

COST STRUCTURE (typical USA):

- Pull-ups: \$0.30-0.50 each × 6/day × 365 = \$657-1095/year
- Specialty diapers for older kids: even more expensive
- Diaper accessories (wipes, creams): \$200-400/year
- Previously tried products (potties, stairsteps, books, courses): historically \$200-1500
- Therapies (BCBA, OT, Speech): \$X thousand/year (often via insurance/Medicaid)

MEDICAID USAGE:

- ~25% of audience uses Medicaid for pull-ups
- For Level 3: ~40% Medicaid users
- Hierarchy: Medicaid → State Programs → Out-of-pocket

"WASTED MONEY" FEELING:

- Often invested \$500-2000 in other products
- Deep "I've already wasted so much" feeling
- Hesitation before new purchases
- But: ready to invest when mechanism convinces

EMAIL IMPLICATION:

- Math reframes work, but carefully (not preachy)
- Medicaid sensitivity important (especially Level 3)
- Never "\$876 a year wasted!" — feels marketing-like

PART B: PSYCHOLOGY

6. THE 4 EMOTIONAL PHASES

The avatar moves through 4 phases. Each phase has its own buying readiness, skepticism level, and appropriate mail tonality.

IMPORTANT: Most BrightKidCo subscribers are in Phase 2-3. Phase 1 is top-of-funnel (rare), Phase 4 is win-back audience.

PHASE 1: SLOW REALIZATION

Child 2.5-3.5 years old

INNER WORLD:

- First comparison pain ("why is his cousin already...")
- Pediatrician asks about toileting at 3-year check
- She still thinks: "boys are slower", "not ready yet"
- Starts with unspecific search queries

EMOTIONAL STATE:

- Worry, but not crisis
- Still has hope for "easy fix"
- Open to new ideas
- Ready to invest money
- Not yet skeptical toward brands

DECISION TRIGGERS:

- Pediatrician comment
- Comparison with peers
- Own research initiative

MAIL TONALITY FOR PHASE 1:

- Education-oriented, gentle
- "You're not alone" + "there's a reason"
- No hard sales hooks
- Mechanism-first approach works particularly well
- Hope language OK ("This may help...")

TYPICAL QUOTES PHASE 1:

- "I'm not sure if he's just being stubborn or if there's something else going on."
- "He's almost 3 and shows zero interest in the potty."
- "Should I be worried?"

PHASE 2: FIRST REAL ATTEMPT

Child 3-4 years old

INNER WORLD:

- Has bought "Oh Crap" book or similar

- Has blocked a long weekend for "bootcamp"
- Set child naked on couch, waiting for "pee-pee dance"
- ...that never comes
- 3 days become 7 become 2 weeks, stress escalates
- Gives up, puts child back in pull-ups
- Feels guilty, depressed

EMOTIONAL STATE:

- First real defeat experienced
- Self-doubt ("did I do it wrong?")
- Frustration with the child ("why doesn't he understand?")
- Guilt seesaw: "It's me" ↔ "It's him" ↔ "Maybe the method"
- Starts searching for AUTISM-SPECIFIC solutions

DECISION TRIGGERS:

- Painful failure of a specific method attempt
- Pediatrician follow-up conversation
- Upcoming kindergarten/Pre-K deadline

MAIL TONALITY FOR PHASE 2:

- Validation-first: "You did nothing wrong"
- Mechanism explanation becomes critical
- Soft belief shift: "It was the wrong method, not her"
- This is the BIGGEST conversion lever in the entire avatar journey
- Specific failure acknowledgment ("Sticker chart didn't work, did it?")

TYPICAL QUOTES PHASE 2:

- "I used the Oh Crap method which totally stressed her and me out."
- "We've been on day 4 and made zero progress. I'm losing it."
- "I feel like such a failure."
- "Am I doing something wrong?"

PHASE 3: METHOD CYCLING

Child 4-6 years old

INNER WORLD:

- Tries sticker charts, social stories, visual schedules,

ABA protocols, special seats

- Finds OT (Occupational Therapist) helpful
- Hears about "interoception" for the first time
- Some kids train in this phase, many don't
- Becomes cynical toward "new solutions"
- "Tried everything" becomes the standard phrase

EMOTIONAL STATE:

- Default mode: SKEPTICISM
- "I've tried everything" is a trauma response, not just a statement
- But: ready for solutions with SPECIFIC mechanism
- No longer reacts to "general parenting advice"
- Reacts to: science (especially Kelly Mahler), mechanism specificity, peer-to-peer voice, brand founder authenticity

DECISION TRIGGERS:

- OT recommendation ("you should try interoception-based approaches")
- BCBA feedback ("we've maxed out behavioral interventions")
- Experience exchange in autism community
- Specific science research

MAIL TONALITY FOR PHASE 3:

- Hard-sell is poison
- Science-first (Kelly Mahler, SPARK study)
- Mechanism specificity over brand promises
- Realistic before/after stories with messy details
- "Try-and-judge" framing (60-day guarantee)
- Permission-not-to-buy energy creates trust

TYPICAL QUOTES PHASE 3:

- "I've tried charts. I've tried a potty chair, a seat on the big toilet, peeing outside, having him pee his underwear. Nothing works."
- "We've been potty training for 3 years."
- "I'm just exhausted at this point."
- "His OT mentioned interoception, but I'm not sure what to do with that."

PHASE 4: RESIGNATION FORK

Child 6+ years old

INNER WORLD:

- Has accepted: child is "late" or "maybe never"
- Plans stocks of pull-ups, maybe Medicaid
- Has stopped actively trying
- OR: has new energy push before important event (school start, travel, sibling birth, school trip)

EMOTIONAL STATE:

- Two versions coexist:
 - Version A: "I gave up, he'll do it when he's ready"
 - Version B: "I'm trying one last time, because X is coming"
- Deeply hurt by failed hopes
- Reacts to: hope-reawakening through real science
- Doesn't react to: standard sales pitch, "easy" language

DECISION TRIGGERS:

- Upcoming life events (school, travel, etc.)
- Sibling comparison intensifies
- Pull-up size change to adult diapers
- Puberty approaches (hygiene concerns)

MAIL TONALITY FOR PHASE 4:

- Very respectful, no energy pushes
- "It's not too late" as anchor (Maureen Bennie's son was 9.5)
- Late-trainer stories prominent
- Longer timeline promises ("8 weeks with patience")
- Pull-up difficulties as trust bridge
- Gentle, never pressure

TYPICAL QUOTES PHASE 4:

- "He's 7 and still in pull-ups. I've given up trying."
- "I just don't see an end in sight."
- "He starts school in September and I'm panicking."
- "We've tried everything for years."

PHASE SUMMARY:

Phase	Child Age	Skepticism	Hope	Tonality
-----	-----	-----	-----	-----

1	2.5-3.5	Low	High	Education, gentle
2	3-4	Medium	Medium	Validation + Mechanism
3	4-6	Very high	Med-Low	Science + Trust
4	6+	Deep, calm	Hidden	Respectful, slow

7. VERBATIM LANGUAGE BANK (RAW QUOTES)

These phrases come directly from customer research. They are gold for subject lines, hooks, and pain points in emails.

RULE: NEVER rewrite into "nicer English". The ROUGH edges are the trust anchor.

CATEGORY 1: HOW SHE DESCRIBES HER CHILD

"He doesn't tell me he is soiled and he doesn't seem to show discomfort by it."

"She doesn't have the ability to feel when she needs to use the bathroom."

"Neither boy was bothered or even seemed to notice if they are wet or dirty."

"He'll start to pee and then run (while peeing) to his potty."

"My son screams and cries for chocolate and refuses to use the toilet."

"She'll pee herself and just keep playing."

"He sits there and doesn't actually go."

"He doesn't realise he needs to go until it's happening."

"He doesn't initiate. Ever."

"The pull-up upgrade — the first time I had to order size 7

diaper I cried."

"My 6 year old son kicked me in the face today, while having a meltdown when I changed his diaper."

"He gets it, but he doesn't get it."

"She knows what to do, she just won't do it."

"He's 4 and still in pull-ups, but he's so smart in everything else."

"He holds his bowel movement until the pull-up goes on at bedtime."

"My daughter screams when the toilet flushes."

"He holds his bowel movements for 5-7 days."

"He's been in pull-ups his entire life. He's 7."

"My son has GI issues, sensory issues, and is completely non-verbal. Potty training isn't even on the radar."

"He's outgrown size 7 pull-ups. We're moving to adult diapers. I cried in the store."

CATEGORY 2: HOW SHE DESCRIBES FAILED METHODS

"We have tried everything from stickers to time training."

"I've tried charts. I've tried a potty chair, a seat on the big toilet, peeing outside, having him pee his underwear, peeing standing up. He's watched Jamie. We've read books, movies, etc. Nothing works."

"None of these methods worked."

"I was discouraged when the Power Cards didn't work."

"We used picture symbols breaking down the process of toileting on a Velcro strip. We kept a bowel movement chart for 3 weeks... We created a social story for toileting. When none of those methods worked, we used a behavioural

contingency plan with photos... None of these methods worked."

"I used the Oh Crap method which totally stressed her and me out."

"I can't describe how many times I've gone on Reddit trying to figure out how to potty train them."

"We're on round who knows what of potty training."

"Each time we try now, it seems like she digs her feet more and more into the sand."

"We feel like failures and just don't see an end in sight."

"His BCBA has tried everything in her training. Nothing has worked."

"We did 40 hours of ABA a week for 2 years. He's still in pull-ups."

"We even did a residential program for 3 weeks. He's back in pull-ups within a month of home."

CATEGORY 3: HOW SHE EXPRESSES SELF-DOUBT

"Maybe I'm not consistent enough."

"Maybe if I were a better parent..."

"I get so defeated I put his diaper back on."

"Potty training is the absolute worst."

"IDK what I'm doing wrong."

"I feel like such a failure."

"I'm just at a loss."

"I'm losing my mind."

"Maybe I started too late."

"His sensory issues are too severe for any product."

"Maybe his autism is too much."

"I think we missed the window."

CATEGORY 4: HOW SHE DESCRIBES PROGRESS (WIN MOMENTS)

These are particularly valuable for post-purchase emails:

"He KNEW he was peeing."

"She pulled at her pants."

"He said 'wet!'"

"He peed in the toilet ONCE today and I cried."

"We went from 10 accidents to 3."

"He paused. Just paused, looked at his legs."

"He felt the wetness for the first time."

"He started holding the front of his underwear right before an accident."

"She was feeling the signal come."

"He paused. He felt something."

"She didn't melt down when I changed her in the bathroom."

"He let me clean her without biting today."

"He went 6 hours without a diaper change. That's a record."

CATEGORY 5: WHAT SHE SEARCHES ON GOOGLE

"potty training autism 5 year old nothing works"

"why can't my autistic child feel when he needs to pee"

"autism still in diapers age 6"

"interoception potty training autism"

"tried everything potty training autism"
"autistic boy refuses to use potty"
"how do you potty train a nonverbal autistic child"
"my autistic son holds his poop"
"potty training regression autism"
"autism 4 year old still wears pull-ups"
"non-verbal autism potty training adult"
"severe autism still in pull-ups age 8"
"adult diapers for autistic child age 9"
"medicaid pull-ups autism level 3"

8. THE 10 FAILED METHODS — WHY EACH ONE FAILED

The avatar has almost certainly tried multiple of these methods. When your email names methods, you **MUST** also explain why they didn't work — otherwise it sounds like advertising.

1. STICKER CHARTS / REWARD-BASED

FAILED BECAUSE: Rewards cannot create or clarify internal body signals.

KELLY MAHLER QUOTE: "Rewards can't create or clarify internal body signals."

2. OH CRAP METHOD / 3-DAY BOOTCAMP

FAILED BECAUSE: Expects "pee-pee dance" as recognition signal. When signal doesn't arrive, child goes naked and it becomes "accident after accident."

3. TIMER-BASED SCHEDULES

FAILED BECAUSE: Replaces internal signal with external one. Creates "prompt-dependent" behavior. Child only goes when brought, never on their own.

4. SOCIAL STORIES / PICTURE SYMBOLS

FAILED BECAUSE: Explains the WHAT but not the HOW-IT-FEELS. Verbal explanation doesn't close the sensory gap.

5. ABA-BASED PROTOCOLS

FAILED BECAUSE: Behavioral compliance without sensory

awareness. Child learns to sit but not to feel.

6. SPECIAL POTTY SEATS / STAIRSTEPS / TRAVEL POTTIES

FAILED BECAUSE: Addresses physical comfort, not signal gap. Sensory triggers may even worsen.

7. NAKED METHOD

FAILED BECAUSE: Child has no sensory reaction to wet legs. Creates trauma + confusion.

8. PULL-UPS WORN LIKE UNDERWEAR

FAILED BECAUSE: Wicking technology removes any signal. Child feels nothing, learns nothing. Pull-ups actively prolong the problem.

9. PUNISHMENT / SHAMING

FAILED BECAUSE: Creates anxiety, withholding, regression. Child learns: toilet = stress.

10. "JUST WAIT UNTIL HE'S READY"

FAILED BECAUSE: For ASD kids, "readiness signs" often NEVER come spontaneously. Waiting only prolongs the diaper routine embedding.

EMAIL IMPLICATION:

These 10 failures can be used in any Welcome Education / FAQ / Cart Recovery email. Format:

"You've tried [method]. Here's why it couldn't work for your child's nervous system: [neurological explanation]."

9. TRUST MECHANIC PYRAMID

How trust is built with this avatar (most important to secondary source):

IMPORTANT: This order is NON-NEGOTIABLE. If the marketer brings #5 (discount) before #1 (mechanism), they lose the avatar.

ADDITIONAL TRUST BOOSTERS (secondary):

- Kelly Mahler references (gold standard in interoception)
- SPARK / Wiggins study for stats (49% stat)
- OT/BCBA co-signs
- Real-parent testimonials with messy details
- Length and journey markers in testimonials ("3 years", "5 weeks")
- 16,511 reviews / 4.9 stars / 100,000+ parents (brand-backed)

10. OBJECTION MAP — THE 10 MOST COMMON OBJECTIONS

CATEGORY D: AGAINST HERSELF

D1 — "I've tried everything. Why would this be different?"

INTENSITY: VERY HIGH

EXACT THOUGHT PATTERN:

"My husband and I had tried various methods over the past 3 years. We used picture symbols, social stories, behavioral contingency plans. None of these methods worked."

COUNTER STRATEGY:

1. Name each method explicitly (sticker chart, social story, ABA, naked method, scheduled sits, timers, 4 different potty seats)
2. Explain WHY each one failed (sensory gap argument)
3. Reframe: "You haven't failed. You solved the wrong problem."

LANGUAGE THAT WORKS:

"Sticker charts. Social stories. Timed sits. ABA protocols. 4 different potty seats. We've heard about all of them. You already know they don't work for your kid. Here's why none of them COULD work."

USE IN: Welcome E2-E4, FAQ E1, Cart Abandonment E2

D2 — "Maybe I'm the problem"

INTENSITY: VERY HIGH

EXACT THOUGHT PATTERN:

"Maybe I'm not consistent enough. Maybe I give in too easily. Maybe if I were a better parent..."

COUNTER STRATEGY:

- Direct absolution: "You're not the problem."
- Scientific explanation: "Your child's nervous system processes internal signals differently."
- SPARK stat: "49% of autistic 4-5 year olds aren't trained. You're not alone."

LANGUAGE THAT WORKS:

"You're not the problem. Your child's nervous system processes internal signals differently. No amount of consistency can create a sensation that the brain isn't receiving."

USE IN: Welcome E1, E2, Cart Abandonment E1

D3 — "What if I get my hopes up again and it fails?"

INTENSITY: HIGH

EXACT THOUGHT PATTERN:

"I was discouraged when the Power Cards didn't work. I combed the internet for some words of wisdom and found

nothing."

COUNTER STRATEGY:

- Don't promise success. Promise different mechanism.
- Intellectual engagement reduces emotional risk
- 60-day guarantee as hope-risk absorber

LANGUAGE THAT WORKS:

"We're not asking you to hope. We're asking you to understand WHY the other approaches didn't address the root issue. Then decide if this mechanism makes sense for your child."

USE IN: Welcome E3-E4, Checkout Abandonment E2

D4 — "He's too old/severe for any product to help"

INTENSITY: MEDIUM-HIGH (HIGH for Level 3)

EXACT THOUGHT PATTERN:

"The greater the developmental delay, the greater the toileting delay tends to be."

COUNTER STRATEGY:

- Elizabeth Cross, PhD: "The vast majority of autistic children CAN be potty trained."
- Late-trainer stories (Maureen Bennie's son 9.5)
- "Late is not never"

LANGUAGE THAT WORKS:

"Maureen Bennie's son was 9.5 when he finally trained. Another family in our community: 8 years. Late is not never."

USE IN: Level 3-specific mails, Winback Path A

CATEGORY C: AGAINST THE BRAND (UNKNOWN)

C1 — "I've never heard of this brand"

INTENSITY: HIGH

COUNTER STRATEGY:

- Real-parent testimonials with messy details
- Lena as customer support (peer-to-peer)
- OT/BCBA co-signs (Kelly Mahler, SPARK stat)

- 16,511 reviews / 100,000+ parents
- Raw parent language, no polished marketing

C2 — "I need to see it works for kids LIKE MINE"

INTENSITY: HIGH

EXACT THOUGHT PATTERN:

"A Level 1 success story doesn't help me. My child is Level 3 / non-verbal / 7 years old. Show me someone whose kid is like mine."

COUNTER STRATEGY:

- Cross-level strategy in language
- Symptom descriptions instead of level labels
- Specific testimonials matching the level (pop-up tagging enables targeting)
- 3-family testimonial pattern for General Fallback

C3 — "Is this worth \$30-50 when I've already wasted so much?"

INTENSITY: MEDIUM

COUNTER STRATEGY:

- Math reframe (carefully, not preachy)
- 60-day refund eliminates risk
- Show: what happens if you DON'T invest (continued pull-up dependency)

LANGUAGE THAT WORKS:

"Pull-ups cost roughly \$876 a year. And they're actively preventing learning. The 3+3 bundle is \$79.99 with a 60-day guarantee. The math isn't the point — but if you want to do it, the math works."

CATEGORY B: AGAINST THE PRODUCT

B1 — "I tried underwear and it didn't help either"

INTENSITY: HIGH (MOST DANGEROUS — appears to disprove mechanism)

EXACT THOUGHT PATTERN:

"Unfortunately neither boy was bothered or even seemed to notice if they are wet or dirty."

COUNTER STRATEGY:

- Difference: signal duration & intensity
- Plain underwear: brief, diffuse sensation
- Body-Signal Learning Layer: sustained, localized 30-60s sensation
- Designed for hypo-responsive systems

LANGUAGE THAT WORKS:

"Plain underwear gives a quick, diffuse sensation that disappears fast. The Body-Signal Learning Layer creates a sustained, localized wetness sensation for 30-60 seconds — designed for nervous systems that need MORE signal, not less."

B2 — "My BCBA has a whole protocol. I trust that more."

INTENSITY: LOW-MEDIUM (HIGH for Level 2-3)

COUNTER STRATEGY:

Don't oppose ABA. Position as missing complement.

LANGUAGE THAT WORKS:

"ABA protocols work for the behavioral component. Body-Signal underwear works for the sensory component. Together, they close both gaps."

B3 — "My kid will rip them off / refuse to wear them"

INTENSITY: MEDIUM (Level 2-3)

COUNTER STRATEGY:

- Sensory-design acknowledgment (tagless, soft seams)
- Gradual transition tips
- Many parents start with naps/short periods

B4 — "We have GI issues / withholding"

INTENSITY: MEDIUM (relevant for ~40% of audience)

COUNTER STRATEGY:

- Address: this works for daytime urine awareness primarily
- BM-training is separate, longer process
- Doesn't replace medical management

These 5 levers work in EVERY flow, EVERY mail, for EVERY level of the avatar. Universal trust maximizers.

LEVER 1: "It's not the method. It's a sensory gap."

PSYCHOLOGICAL EFFECT:

- D1+D2 absolution simultaneously (Maybe I'm the problem + I've tried everything)
- Belief shift: from "behavior issue" to "neurological issue"
- Avatar feels seen, not judged

USE IN:

- Welcome E2-E4
- FAQ mails
- Cart Recovery
- Browse Abandonment
- Winback

HOW IT FEELS TO THE AVATAR:

"Finally, someone gets it. It was never my fault. It was never his fault. It was the wrong approach all along."

LEVER 2: "Pull-ups make this worse"

PSYCHOLOGICAL EFFECT:

- Reframe: pull-ups are not neutral, they actively damage
- Creates urgency WITHOUT manipulation
- Shifts blame from mother to product

USE IN:

- Welcome E2 (Mechanism)
- Welcome E4-E5 (Education)
- Browse Abandonment
- Cart Recovery
- Winback (especially strong here)

CAUTION FOR LEVEL 3:

- Pull-ups are often Medicaid-funded or existential
- Not "abandon pull-ups" but "add alongside"
- Daytime trial vs. nighttime continuation OK

LEVER 3: "Try it for 60 days. By your judgment."

PSYCHOLOGICAL EFFECT:

- Reduces hope-risk (D3 objection)
- Creates "you decide" framing
- Brand trust through risk transfer

USE IN:

- ALL flows, especially conversion-oriented
- Cart Recovery (critical)
- Checkout Abandonment
- Welcome E3 (Last Day)
- Winback

HOW IT FEELS TO THE AVATAR:

"They're not selling me hope. They're letting me test if it fits. That's the first reasonable offer I've seen."

LEVER 4: "I have two autistic sons" (Lena's Voice)

PSYCHOLOGICAL EFFECT:

- Brand becomes person
- Trust increases 200%+ when marketing voice becomes peer-to-peer voice
- Creates realism through persona identification

USE IN:

- Lena sign-off in ALL mails (see section 13)
- Reply encouragement
- Post-purchase empathy moments

HOW IT FEELS TO THE AVATAR:

"This is a real person, not a brand. She knows. She's been where I am."

LEVER 5: "49% of autistic 4-5 year olds are not toilet trained"

PSYCHOLOGICAL EFFECT:

- Normalizes her situation
- Removes self-blame
- Gives data anchor for "this is real, not just my kid"
- SPARK research credibility

USE IN:

- Welcome E2
- FAQ E1
- Winback E1
- Whenever self-blame pattern is recognized

HOW IT FEELS TO THE AVATAR:

"I'm not alone. Half of these kids are in the same boat.
This is a real, measurable, common challenge — not my failure."

PART C: BRAND VOICE FOUNDATION

12. BRAND IDENTITY & VOICE

HOW BRIGHTKIDCO SOUNDS:

WE ARE:

- A brand that exists because the founder (Mary S.) went through this journey herself
- Led by Lena (Customer Support, Mom of two autistic sons)
 - she's the first human touchpoint for the avatar

- Clinically informed, but emotionally raw
- Knowledge-based, not hope-based

WE ARE NOT:

- A "wellness brand" with positive vibes
- An "expert brand" that knows everything
- A "miracle product brand"
- Polished, perfect, or predictable

THE VOICE:

- Like an OT who is also a mom of an autistic child
- Like a friend who went through the same thing
- Like an experienced caregiver with two sons on the spectrum

13. LENA VOICE RULES (CUSTOMER SUPPORT)

LENA WRITES LIKE A FRIEND, NOT A FOUNDER.

LENA'S PROFILE — ALWAYS THE SAME:

- Name: Lena S.
- Role: Customer Support
- Profile subtitle: "Customer Support · Mom of two autistic sons"
- Sons: one is 6 (still working on it), the other 8 (took us until almost 8 to train)

LENA WRITES LIKE:

- A friend who went through the same thing
- Combining empathy with knowledge
- Direct without being harsh

LENA DOES NOT WRITE LIKE:

- A founder saying "I built this!"
- A brand strategist
- A "spiritual journey" influencer
- A salesperson

LENA VOICE FORMULA:

1. Observation of reality (specific scenario)

2. Validation without drama
3. Mechanism or information
4. Permission / soft action

EXAMPLE OF A LENA MAIL PASSAGE:

"Your kid sits on the toilet, you wait, nothing happens.
Then you put the pull-up back on, and 30 seconds later
there's pee in it. I know that one. Both my sons did it for
years. It's not defiance — it's a signal timing issue.
Here's what helped us..."

LENA'S SIGN-OFF RULES (CRITICAL):

EVERY mail ends with Lena sign-off. NEVER founder framing
in regular mails.

FORBIDDEN:

- "I'm the founder of BrightKidCo"
- "I'm not the founder, I'm..."
- "I started this company because..."
- 4+ paragraphs of sign-off text
- Story drama about sons

ALLOWED:

- "Lena S."
- "Mom of two autistic sons"
- "If you reply, you get me"
- "I have two autistic sons. One is 6, still working on it.
The other took us until he was almost 8."

LENGTH: Sign-off body max 2-3 sentences. P.S. max 2 lines.

STANDARD LENA SIGN-OFF TEMPLATES:

SHORT VARIANT (Welcome E1, transactional):

"Thanks for being here.

If you have a question, hit reply. You'll get me — not a
template, not a bot. I read everything.

Lena ——"

MEDIUM VARIANT (with sons reference):

"I have two autistic sons. One's 6, still in the middle of

it. The other took us until he was almost 8.

If your kid is anywhere on this curve — that's normal here.

Lena —

P.S. Reply if anything in this resonates with what you've been seeing at home. I read every one."

LONG VARIANT (Cart Recovery, Last Day):

"Whatever you choose — thanks for reading this far.

If this isn't the day, that's okay. The product will be here next month. So will I.

I have two autistic sons. I know what it's like when 'later' turns into another year. But I also know what it's like to push too early. Trust your read.

Lena —"

14. MARY S. — THE FOUNDER (PHASE 2 USE)

IMPORTANT: Mary S. is NOT Lena. Never mix them.

MARY S. PROFILE:

- Founder of BrightKidCo
- Appears in Phase 2 as dedicated PP-Mary-S-Story mail
- Brand origin, mission, "why we built this"
- Will not be expanded in Phase 1 (comes later)

PHASE 1 NOTE FOR MARKETER:

In Phase 1, Mary S. does NOT appear in regular mails. Lena is the primary voice. Mary S. will be introduced in Phase 2 as a separate dedicated mail.

15. FORBIDDEN PHRASES & SENSITIVE AREAS

PHRASES THAT KILL TRUST — NEVER USE:

- ✗ "Easy" / "Simple" / "Effortless"
- ✗ "Train your kid in 3 days"
- ✗ "Finally solved everything"
- ✗ "Guaranteed results"
- ✗ "Just like neurotypical kids"
- ✗ "Suffering from autism" (autism = identity, not disease)
- ✗ "High-functioning" / "Low-functioning" (controversial)
- ✗ "Wait until they're ready" (trigger word — she's had this advice 100× and hates it)
- ✗ "Just try harder"
- ✗ "Be more consistent"
- ✗ "Your child should..."
- ✗ "Most children at this age..."
- ✗ "Have you tried [obvious method]" — she's tried everything
- ✗ "Don't worry" — minimizes her real concerns
- ✗ "We understand" without substance
- ✗ "Cure" / "Solve" / "Fix" — autism isn't to be fixed
- ✗ "Your child will be normal"
- ✗ "Get him trained!" — pressure language

SENSITIVE AREAS — WITH EXTRA CARE:

1. SELF-BLAME

She's already on a guilt seesaw. Mails must NEVER hint that she's doing something wrong.
Always absolve, never accuse.

2. PARTNER CONFLICT

Mails must not sound like she has to convince her partner.

3. COMPARISON WOUND

Playground comparisons with neurotypical peers are triggers. Mails must NEVER position neurotypical kids as standard.

4. PEDIATRICIAN FRUSTRATION

Gently acknowledge, never attack the entire medical profession.

5. FINANCIAL HARDSHIP

~25% use Medicaid. \$79.99 is real commitment. Math
reframe OK, never preachy.

6. CHILD'S IDENTITY

NEVER "your son will be normal" — autism = identity, not
disease. "Help his nervous system" > "fix his behavior".

PART D: ECOSYSTEM ARCHITECTURE

16. POP-UP SETUP & SEGMENTATION

POP-UP TECHNICAL SPECS:

Trigger: Visitor on site after 8-15 seconds OR exit-intent
Display: 1-step pop-up with email + question
Mobile-optimized: yes, full-screen on mobile
Frequency: Maximum 1× per 7 days per visitor

POP-UP CONTENT:

HEADLINE:

"Get 10% off + a potty training plan
built for kids like yours."

SUBHEADLINE:

"What describes your child best?"

OPTIONS (4 buttons):

[Talks about potty but won't actually do it]

→ Tag: avatar_level1

[Sensory issues, tried many methods]

→ Tag: avatar_level2

[Non-verbal or high support needs]

→ Tag: avatar_level3

[Still figuring out what's going on]

→ Tag: avatar_general

EMAIL FIELD:

[enter your email]

CTA BUTTON:

[Get My 10% Code]

PRIVACY NOTE (small print):

"We respect your inbox. Unsubscribe anytime."

STEP 2 (immediately after submit):

HEADLINE:

"Your code is ready."

CODE DISPLAY:

WELCOME10

(prominent, large font)

NOTE:

"Auto-applies at checkout. Valid 7 days."

CTA BUTTON:

[Shop Now]

CLOSE OPTION:

"or keep browsing"

IMPORTANT: Code is displayed DIRECTLY, not via email confirmation. Customer can buy immediately without checking inbox.

KLAVIYO IMPLEMENTATION:

- Pop-up via Klaviyo Forms or external tool (Privy,

Justuno)

- Email + tag are written to Klaviyo
- Tag triggers Welcome Flow (level-specific variant)

17. COMPLETE FLOW OVERVIEW (25 FLOWS)

PRE-PURCHASE FLOWS (Acquisition):

01. Welcome Flow (CONSOLIDATED Discount + Education)

Trigger: Pop-up signup with level tag

Mails: 8 (over 21 days)

Segmentation: 4 level variants

PHASE 1

02. Cart Abandonment Flow

Trigger: Cart Abandoned (Klaviyo)

Mails: 3

Segmentation: Cross-level

PHASE 1

03. Checkout Abandonment Flow

Trigger: Started Checkout Abandoned (Klaviyo)

Mails: 2

Segmentation: Cross-level

PHASE 1

04. Browse Abandonment Flow

Trigger: Viewed Product no Cart (Klaviyo)

Mails: 3

Segmentation: Cross-level

PHASE 2

TRANSACTIONAL FLOWS:

05. Order Confirmation Flow

Trigger: Order Placed (Shopify → Klaviyo)

Mails: 1 (with cross-sell block)

Segmentation: Cross-level

PHASE 1

06. Shipping Notification Flow

Trigger: Order Fulfilled

Mails: 1

Segmentation: Cross-level

PHASE 1

07. Out for Delivery Flow (optional)

Trigger: Carrier update "Out for Delivery"

Mails: 1 (optional)

Segmentation: Cross-level

PHASE 1

08. Arrived & Welcome Flow

Trigger: Carrier update "Delivered"

Mails: 1 (with massive upsell)

Segmentation: Cross-level

PHASE 1

POST-PURCHASE FLOWS:

09. Post-Purchase Direct Upsell Flow

Trigger: Order Placed + Day 1-3

Mails: 2 (Wash Bag + Mattress Protector)

Segmentation: Cross-level

PHASE 1

10. Post-Purchase Mary S. Story Flow

Trigger: Order Placed + Day 3

Mails: 1

Segmentation: Cross-level

PHASE 2

11. Post-Purchase Education Day 0-21 Flow

Trigger: Order Placed

Mails: 4

Segmentation: Cross-level

PHASE 2

12. Post-Purchase Level-Detection Mail

Trigger: Order Placed + Day 14

Mails: 1

Segmentation: Cross-level (asks level)

PHASE 1

13. Post-Purchase Extended Education Flow

Trigger: Level tag activated + Day 22

Mails: 5

Segmentation: 4 level variants

PHASE 3

14. Post-Purchase Extended Upsell Flow

Trigger: Day 28 + level tag

Mails: 3

Segmentation: Level-aware

PHASE 2

15. Post-Purchase Mid Check-In Flow

Trigger: Day 30-60

Mails: 3

Segmentation: Cross-level

PHASE 2

16. Post-Purchase Support At-Risk Flow

Trigger: Day 3-7 no opens

Mails: 4

Segmentation: Cross-level

PHASE 3

LIFECYCLE FLOWS:

17. Replenishment Path A (1-Pair Buyer)

Trigger: 1-pair order + Day 14

Mails: 3

Segmentation: Cross-level

PHASE 2

18. Replenishment Path B (3+3 Buyer)

Trigger: 3+3 order + Day 75

Mails: 2

Segmentation: Cross-level

PHASE 2

19. Replenishment Path C (5+5 Buyer)

Trigger: 5+5 order + Day 150

Mails: 2

Segmentation: Cross-level

PHASE 2

20. Review Request Flow

Trigger: Day 30 post-purchase

Mails: 2

Segmentation: Cross-level

PHASE 2

21. Winback Path A (Post-Buyer Inactive)

Trigger: Last purchase + 90 days no engagement

Mails: 3

Segmentation: 4 level variants

PHASE 2

22. Winback Path B (Subscriber Never-Bought)

Trigger: Signup + 60 days no purchase

Mails: 3

Segmentation: 4 level variants

PHASE 3

23. Sunset Flow

Trigger: 120 days inactive

Mails: 2

Segmentation: Cross-level

PHASE 3

EDUCATION / OBJECTION FLOWS:

24. FAQ/Objection Library Flow

Trigger: Welcome flow end + no purchase

Mails: 6

Segmentation: Cross-level

PHASE 3

SPECIAL FLOWS:

25. Referral Flow

Trigger: Day 30 + positive engagement

Mails: 3

Segmentation: Cross-level

PHASE 3

SUMMARY BY PHASE:

PHASE 1 (Must-Have, immediate launch): 9 flows, 43 unique mails

PHASE 2 (High-Value, months 3-4): 8 flows, 34 unique mails

PHASE 3 (Nice-to-Have, months 5-6): 8 flows, 33 unique mails

TOTAL: 25 flows, 110+ unique mails over 6 months

18. PHASED ROLLOUT

PHASE 1 (LAUNCH-READY, MONTHS 1-2):

These 9 flows MUST exist before BrightKidCo email marketing is scaled:

01. Welcome Flow (32 mails — 8 × 4 levels)
02. Cart Abandonment (3 mails)
03. Checkout Abandonment (2 mails)
04. Order Confirmation (1 mail with upsell)
05. Shipping Notification (1 mail)
06. Arrived & Welcome (1 mail with upsell)
07. Post-Purchase Direct Upsell (2 mails)
08. Post-Purchase Level-Detection (1 mail)

Total Phase 1: 43 unique mails

ORDER OF IMPLEMENTATION (marketer perspective):

1. Welcome Flow (highest priority — all subscribers)
2. Cart + Checkout Abandonment (immediate conversion lift)
3. Transactional (TX 5-8) — customer expects these
4. Post-purchase 9-10 (parallel to delivery)
5. Level-Detection 12 (can also come later)

PHASE 2 (HIGH-VALUE, MONTHS 3-4):

After Phase 1 runs and data flows in, these 8 flows come:

11. Browse Abandonment
12. PP-Mary-S Story

13. PP-Education Day 0-21
14. Review Request
15. PP-Extended Upsell
16. PP-Mid Check-In
- 17-19. Replenishment Path A/B/C
20. Winback Path A

PHASE 3 (NICE-TO-HAVE, MONTHS 5-6):

When Phase 1+2 run and marketing team is established:

21. PP-Extended Education (× 4 levels)
 22. PP-Support At-Risk
 23. Winback Path B (× 4 levels)
 24. Sunset
 25. FAQ/Objection Library
 26. Referral Flow
 27. Birthday Mail (optional)
-

19. KLAVIYO SETUP & TAG LOGIC

KLAVIYO ACCOUNT STATUS: Klaviyo is being newly set up for BrightKidCo. Marketer (Ayoub) does complete setup.

ESSENTIAL KLAVIYO COMPONENTS:

1. SHOPIFY INTEGRATION

- Install Klaviyo-Shopify app
- Sync events: Order Placed, Fulfilled, Delivered
- Sync product catalog for recommendations

2. WEB TRACKING

- Klaviyo JavaScript snippet on all pages
- Tracks: Viewed Product, Started Checkout, Active on Site

3. EMAIL DELIVERABILITY SETUP

- Domain Authentication (DKIM, SPF, DMARC)

- Sending domain: send.brightkidco.com (or similar)
- From Name: "Lena from BrightKidCo"
- From Email: support@brightkidco.com
- Reply-To: support@brightkidco.com

KLAVIYO PROFILE PROPERTIES:

Standard:

- first_name
- last_name
- email
- created_at
- consent (for GDPR)

Custom properties (needed by us):

- avatar_level (string: "level1" / "level2" / "level3" / "general")
- child_age (optional, if mom shared)
- signup_source (string: "popup" / "checkout" / "referral")
- welcome_flow_completed (boolean)
- last_purchase_pack_size (string: "1pair" / "3+3" / "5+5")
- vip_customer (boolean, for high LTV)

KLAVIYO TAGS (Lists/Segments):

From Pop-up:

- avatar_level1
- avatar_level2
- avatar_level3
- avatar_general

From Behavior:

- welcome_completed
- welcome_completed_no_purchase
- post_purchase_active
- at_risk_no_open
- inactive_60_days
- inactive_120_days

From Purchase:

- buyer_1pair
- buyer_3plus3
- buyer_5plus5
- repeat_buyer

- vip_buyer (3+ orders)

SEGMENT LOGIC (for flow routing):

Welcome Flow Variants:

- Level 1 → "avatar_level1" tag + welcome_completed = false
- Level 2 → "avatar_level2" tag + welcome_completed = false
- Level 3 → "avatar_level3" tag + welcome_completed = false
- General → "avatar_general" tag + welcome_completed = false

Post-Purchase Flows:

- Day 0-21 Education → buyer_* tag + days_since_purchase
- Day 14 Level-Detection → if avatar_level = unknown
- Level-Specific Education (Phase 3) → avatar_level tag known after Day 14

Cart/Checkout/Browse:

- Klaviyo cookies track (even without pop-up opt-in)
- Trigger via "Started Checkout" / "Active on Site" / "Viewed Product"

FLOW TRIGGER SUMMARY:

Flow	Klaviyo Trigger	Audience Filter
Welcome	Form Submit	avatar_level tag
Cart Aband.	Cart Abandoned	No purchase 24h
Checkout	Started Checkout	No purchase 1h
Browse	Viewed Product	No cart 24h
Order Confirm	Order Placed	All
Shipping	Order Fulfilled	All
Arrived	Carrier Delivered	All
PP-Direct Upsell	Order Placed	Day 1-3
PP-Level Detection	Order Placed	Day 14 + no level

EXIT CONDITIONS (critical for Klaviyo):

EVERY flow must have these exit conditions:

- Made a purchase (for conversion flows)
- Unsubscribed
- Already in higher-priority flow

20. EMAIL FOOTER STANDARD

EVERY mail (except transactional receipts) ends with:

[BrightKidCo Logo]

Built for the brain that learns differently.

[Links — all plain text, no bold]

Shop · Parent Stories · Contact us · FAQ

[Social Icons]

Instagram · TikTok

[Reviews microcopy]

16,511 reviews · 4.9 ★ — 100,000+ parents trust BrightKidCo

[Business Address Placeholder]

BrightKidCo · [Address]

[Klaviyo Tags]

{% unsubscribe %} · Manage preferences

LINK URLS (USE EXACTLY AS WRITTEN):

- Shop: <https://www.brightkidco.com/collections/all-products>
- Parent Stories: <https://www.brightkidco.com/pages/real-parent-stories>
- Contact: <https://www.brightkidco.com/pages/contact>
- FAQ: <https://www.brightkidco.com/pages/faq>
- Instagram: https://www.instagram.com/brightkidco_official/
- TikTok: <https://www.tiktok.com/@brightkidco.com>

IMPORTANT:

- NO Trustpilot link (no page exists)
- NO Facebook link (not used by brand)
- NO review buttons leading to non-existent pages
- Reviews microcopy only as text, not clickable

KLAVIYO IMPLEMENTATION:

Footer is saved as a reusable block in Klaviyo — marketer builds it once and uses in all mails.

PART E: OPERATIONAL FRAMEWORKS

21. TONALITY CALIBRATION PER FLOW STAGE

Different flow stages require different tonalities. Marketer must know: WHERE in the funnel is the avatar, HOW should I sound?

STAGE: PRE-PURCHASE (Welcome, Cart, Browse, Checkout)

TONE: Education + Soft Conversion
LANGUAGE: Specific, mechanism-led, peer-to-peer
ENERGY: Calm, confident, "we're not in a hurry"

DO: Validate failures, explain mechanism, soft CTA
DON'T: Hard-sell, urgency manipulation

SAMPLE OPENING:
"You came for the code. Stay for the reason nothing else worked."

STAGE: CONVERSION MOMENT (Cart-Recovery final, Checkout)

TONE: Friendly Reminder + Permission Not To Buy
LANGUAGE: "If today isn't right, that's a real answer"
ENERGY: Decision-respect, "you decide"

DO: Reduce friction, offer guarantee, soft permission

DON'T: Pressure tactics, fake scarcity, guilt-tripping

SAMPLE OPENING:

"You left the 3+3 bundle in your cart. I'm not chasing — but I want to answer the question you might be sitting with."

STAGE: TRANSACTIONAL (Order Confirm, Shipping)

TONE: Warm + Functional

LANGUAGE: Direct, informative, branded

ENERGY: Professional but human

DO: Clear info, set expectations, soft upsell spot

DON'T: Too much sales talk, treat like marketing mail

STAGE: POST-PURCHASE EARLY (Arrived, Day 0-7)

TONE: Warm + Reassurance + Education

LANGUAGE: "Here's what to expect"

ENERGY: Welcome to the family

DO: Confirm purchase, set realistic Week-1 expectations, introduce sensory prep tips

DON'T: Hard re-sell, oversell ease of use

SAMPLE OPENING:

"Your underwear is here. Open the box together — let your kid touch it first. Sensory familiarity helps."

STAGE: POST-PURCHASE MID (Day 14-60)

TONE: Realistic + Patient + "It's normal"

LANGUAGE: "Week 1 plateau is real. Hold the line."

ENERGY: Coach + cheerleader

DO: Manage expectations, celebrate mini-wins, troubleshoot

DON'T: Promise quick wins, abandon them if no progress

SAMPLE OPENING:

"It's been 3 weeks. If you're not seeing what you hoped — that's expected. Here's what Week 4 typically looks like."

STAGE: LIFECYCLE (Replenishment, Winback, Sunset)

TONE: Respectful Re-engagement

LANGUAGE: "How are you doing?" / "Whichever path you take"

ENERGY: Genuinely curious, low-pressure

DO: Acknowledge time, no guilt, reopen conversation softly

DON'T: "You forgot us" guilt-tripping, aggressive re-engage

SAMPLE OPENING:

"It's been a while. No pressure — but if your kid is still in pull-ups, here's what I'd suggest looking at next."

22. CROSS-LEVEL CALIBRATION RULES

How to ensure mails reach all ASD levels simultaneously — especially important for cross-level flows and General Fallback audience.

RULE 1: SYMPTOM DESCRIPTION OVER LEVEL LABEL

NEVER: "If your child is Level 2 or Level 3..."

YES: "If your child doesn't feel when they need to go..."

Symptoms are cross-level universal.

RULE 2: 3-5 RECOGNITION ANCHORS PER MAIL

In EVERY mail there must be a block with at least 3 specific situations. So all levels recognize themselves:

Level 1 typical:

- "Sits 20 minutes on toilet and nothing happens"

- "Sometimes succeeds, sometimes doesn't"

Level 2 typical:

- "Pees immediately when pull-up comes off"
- "Plays while peeing"

Level 3 typical:

- "Doesn't react to wet diaper"
- "Made no progress in 4 years"

Mom reads the list, finds 1-2 that exactly match her situation.

RULE 3: AGE RANGES INSTEAD OF FIXED AGES

NEVER: "For 5-year-olds..."

YES: "For kids 3 to 10+..."

RULE 4: VERBAL/NON-VERBAL INCLUSIVITY

When giving verbalization examples, always both:

"Look for signals: pulling at their pants, looking down, saying 'wet,' or showing you with a gesture."

→ Verbal: "saying 'wet'"

→ Non-verbal: "showing you with a gesture"

RULE 5: TIMELINE FLEXIBILITY

NEVER: "In 30 days your child will..."

YES: "Some kids show first signals after 2 weeks. Others need 8 weeks. Both are normal."

RULE 6: SUCCESS METRICS LOW BAR

Define "success" as mini-wins, not "fully trained":

- "Look at the wet spot for the first time"
 - "Pull at their pants in awareness"
 - "Walk toward the bathroom (even after the accident)"
 - "Stay dry 2 hours instead of 30 minutes"
-
-

23. STRUCTURAL DO'S & DON'TS PER MAIL

DO'S — STRUCTURE PATTERNS THAT WORK:

- ✓ Open with the symptom (not the solution)
- ✓ Acknowledge prior failures BEFORE proposing mechanism
- ✓ Use 3-5 specific scenarios per mail (cross-level recognition)
- ✓ Make Lena's voice the trust anchor (not brand voice)
- ✓ Offer permission not to buy (reduces resistance)
- ✓ Realistic timelines with ranges (not fixed promises)
- ✓ Cite Kelly Mahler / SPARK research when relevant
- ✓ Mini-wins as success metrics (not "fully trained")
- ✓ Use {first_name} in greeting and key emotional moments (but not over-use)
- ✓ End with peer-to-peer Lena moment + soft CTA

DON'TS — STRUCTURE PATTERNS THAT KILL TRUST:

- ✗ Lead with the product
- ✗ Use "easy/quick/simple" anywhere
- ✗ Promise outcomes tied to timelines
- ✗ Compare to neurotypical kids as standard
- ✗ Suggest the parent isn't doing enough
- ✗ Use level labels (Level 2/3) in copy
- ✗ Stack social proof early (saves it for later)
- ✗ Use urgency manipulation ("only 24 hours!")
- ✗ Use exclamation marks in body text (signals marketing)
- ✗ Use "we know how you feel" — too cheap
- ✗ Use generic stock images of neurotypical happy families
- ✗ End mails with hard-sell CTAs ("BUY NOW!")

24. BUYER JOURNEY MAPPING

When does she reach which mail in which emotional state?
Here the mapping:

PHASE: AWARENESS (Pre-Subscribe)

WHERE: Meta ad, Google search, friend recommendation
EMOTIONAL STATE: Skeptical, curious, tired of marketing
WHAT MOVES HER FORWARD: Specific mechanism mention,
peer-to-peer voice, no over-promise

PHASE: CONSIDERATION (Post-Subscribe, Welcome Flow)

Day 0 (Welcome E1):
EMOTIONAL STATE: Hopeful but critical
TIPPING POINT: Recognizes her problem in the mail

Day 1 (Welcome E2 — Mechanism):
EMOTIONAL STATE: Engaged, wants to understand more
TIPPING POINT: "Holy shit, that explains it"

Day 3 (Welcome E3 — Last Day):
EMOTIONAL STATE: Decision time, conflict between hope and
fear of disappointment
TIPPING POINT: 60-day guarantee + permission not to buy

Day 7 (Welcome E4 — Education):
EMOTIONAL STATE: If not bought, now wisdom audience
TIPPING POINT: "You didn't fail" reframe

Day 14-21 (Welcome E5-E8):
EMOTIONAL STATE: Slowly accepting if not bought, OR
already in PP-Flow

PHASE: ABANDONMENT (Cart/Checkout)

Hour 1 (Cart Abandonment E1):
EMOTIONAL STATE: She was about to buy, then doubted
TIPPING POINT: Mechanism reminder + reassurance

Day 1 (Cart Abandonment E2):
EMOTIONAL STATE: Distraction, other concerns
TIPPING POINT: Specific reminder with stories

Day 3 (Cart Abandonment E3):

EMOTIONAL STATE: Last chance, decision fatigue

TIPPING POINT: 60-day guarantee, soft permission

PHASE: PURCHASE & DELIVERY

Day 0 (Order Confirmation):

EMOTIONAL STATE: Relieved, now committed

TIPPING POINT: Clarity about delivery, what's coming

Day 0-1 (PP-Direct Upsell E1-E2):

EMOTIONAL STATE: Buying mode, low friction for add-ons

TIPPING POINT: Social proof "73% of parents add these"

Day 7-10 (Shipping Notification, Arrived):

EMOTIONAL STATE: Anticipation peak

TIPPING POINT: "Open box together" — sensory prep

PHASE: USE & ADAPTATION

Day 0-7 Post-Arrival:

EMOTIONAL STATE: Hoping, observing, vulnerable

TIPPING POINT: Set realistic Week-1 expectations

Day 7-21:

EMOTIONAL STATE: Some progress or frustration

TIPPING POINT: Mini-wins acknowledgment

Day 14 (Level Detection):

EMOTIONAL STATE: Engaged, wants help

TIPPING POINT: "Tell us about your child" — felt-seen

Day 21+:

EMOTIONAL STATE: Trust building OR considering refund

TIPPING POINT: Level-specific support kicks in

25. VISUAL & DESIGN CUES

When marketer designs mails, here guidance per element:

HERO IMAGES — DO'S:

- ✓ Real parents and real kids in real homes
- ✓ Soft natural lighting, neutral cream/sage/sand tones
- ✓ Diverse representation (different ethnicities, family setups)
- ✓ Kids 3-10 years (range, not just toddlers)
- ✓ Hands, silhouettes, half-faces (less invasive)
- ✓ Product context (visible underwear) — not packaging
- ✓ Mood: calm, real-life, not over-staged

HERO IMAGES — DON'TS:

- ✗ Stock images of neurotypical happy families
- ✗ Bright cartoon colors for toddler-brand look
- ✗ Cleaning chaos as drama image
- ✗ Children's faces full-on (privacy + over-personal)
- ✗ "Before/After" style with shame implications
- ✗ Pull-ups staged as "evil"

COLOR PALETTE:

Brand Primary:

- Brand-Green: #039902 (CTAs, accents)
- Mint: #DBFFCD (highlight boxes, soft backgrounds)
- Cream Card: #FBF7EB (card backgrounds)
- Dark Text: #1A1A1A (body text, sign-off bg)

Secondary:

- Brand-Yellow: #F5C84B / #F5CB5C (badges, stars)
- Soft Gray: #9AA8A7 (subtle text, strikethrough)
- Body Gray: #4A4A4A (sub-captions, italic notes)

Background:

- Off-white: #FAF9F7 (overall background)
- Cream variations for sections

TYPOGRAPHY:

Brand Font: Questrial (mandatory for all assets)

- Weight: 400 only (never bold for body)
- Headlines: 24-32px Desktop / 20-24px Mobile
- Body: 16px Mobile / 17px Desktop
- Captions: 13-14px

DESIGN PATTERNS:

- ✓ Cards with subtle shadows (not heavy)
- ✓ Border-radius 12-16px for warmth
- ✓ Plenty of whitespace
- ✓ "—" separator for list items (instead of bullets)
- ✓ Section spacing 48-64px

- ✗ Heavy borders, hard edges
- ✗ Centered marketing-feel text
- ✗ Big "BUY NOW" buttons
- ✗ Stock icons throughout

CRITICAL RULES:

1. NO cartoon kid illustrations
2. NO infantilized "Big Kid Underwear" graphics
3. Mobile-first design (60%+ traffic)
4. Body min 16px mobile (accessibility)
5. CTAs min 48px height (tap-friendly)

PART F: MARKETER WORKFLOW

26. HOW TO USE THIS DOC

THIS DOC IS YOUR PSYCHOLOGICAL & OPERATIONAL BIBLE.

Reading order:

1. Complete DOC 1 before everything else (this doc)
2. DOC 2-5 (level profiles, depending on mail audience)

3. Flow briefings (separate docs for each flow)

REFERENCE USE:

When you write a mail:

- ☐ Check section 6 (4 phases) — which phase fits the audience?
- ☐ Check section 11 (5 big levers) — which levers fit?
- ☐ Check section 21 (tonality) — which tonality for this stage?
- ☐ Check section 15 (forbidden phrases) — final check before send
- ☐ Check section 23 (do's & don'ts) — structure validation

When you set up Klaviyo:

- ☐ Check section 19 (Klaviyo setup) — tags + properties
- ☐ Check section 17 (flow overview) — trigger per flow
- ☐ Check section 16 (pop-up setup) — form configuration

When you do visuals/design:

- ☐ Check section 25 (visual cues) — hero images, colors, typography
- ☐ Check section 20 (footer standard) — reusable block

27. CROSS-REFERENCES TO DOC 2-5

DOC 1 (this document) = Master Foundation for ALL levels.

For level-specific details:

DOC 2 (Level 1 Profile):

- Verbal kids, 3-5 years
- ~35% of audience
- Hope intact, Pre-K driven
- Phases 1-2 dominant

DOC 3 (Level 2 Profile):

- Mixed verbal, 5-7 years
- ~40% of audience (largest)
- Sensory dominant, BCBA context
- Phase 3 dominant (Method Cycling)

DOC 4 (Level 3 Profile):

- Non-verbal, 6-10+ years
- ~25% of audience
- Resignation Fork
- Phase 4 dominant

DOC 5 (General Fallback):

- Parents without level selection
- ~30-50% real volume
- Cross-level language
- Symptom-first communication

USE:

When you write a mail for a level variant:

1. Start with DOC 1 (foundation)
2. Switch to DOC 2/3/4 (level specifics)
3. For cross-level or general mail: DOC 5

When the mail is cross-level (Cart, Checkout, etc.):

1. DOC 1 (foundation)
2. DOC 5 (cross-level calibration)

28. NEXT STEPS

AFTER READING DOC 1:

- Read DOC 2-5 (your avatar profiles per level)
- Come back with questions if unclear
- Then start with flow briefings (Phase 2 of our project)

PHASE 1 FLOW BRIEFINGS (coming separately):

1. Welcome Flow (× 4 level variants)
2. Cart Abandonment
3. Checkout Abandonment
4. Order Confirmation
5. Shipping Notification
6. Arrived & Welcome
7. PP-Direct Upsell

8. PP-Level Detection

EACH FLOW BRIEFING CONTAINS:

- Flow architecture (trigger, audience, timing)
- Mail-by-mail deep dive
- Subject lines (3 options per mail)
- Preheaders (3 options per mail)
- Send timing
- Section hierarchy
- Conversion levers
- Sample sentences
- Cross-level variations where segmented
- Metrics to track
